### The Church of Our Lady of Rosary - Navelim Goa

The Church of Our Lady of Rosary is located at Navelim in Salcete taluka of South Goa District. Navelim is a Census Town and constituent unit of Margao Urban Agglomeration. This town is situated 2 K.m. away at south of Margao on the National Route Highway NH-17. It is 1.5 Km from Margao Konkan Railway Station. The Church of Our lady of Rosary is an imposing red laterite whitewashed edifice, a tribute erected by its numerous devotees down the centuries to its patrons, the Blessed Virgin Mother of the Rosary viz. The Church known as Igreja de Nossa Senhora do Rosario. The imposing Navelim Church was founded by the Jesuits Fr. Joao de Sena S.J. towards the end of the 16th century. The Church has altogether six Altars. Besides the main altar dedicated to our Lady of Rosary, the side Altars are dedicated to Our Lady of Good Delivery, Saint Anna, Sacred heart of Jesus and Our Lady of piety. The main Altar is richly decorated with carved wooden trelliswork painted in gold. It is believed that Good Mother has blessed thousands of devotees throughout the centuries who have excelled in the past all over the world in various fields of life.

## FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1<sup>st</sup> phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15<sup>th</sup> July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri A.K. Wasnik, Directorate of Census Operations, Goa. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)  
Registrar General &  
Census Commissioner, India

New Delhi.

Dated:- 16-06-2014

## Preface

The Registrar General and Census Commissioner, India has in his foreword to this series of publications, not only provided the reader with the historical background of the District Census Hand book (DCHB) but has also explained the scope and coverage for this important publication. Though the DCHB was first introduced at the 1951 Census, in India, for Goa the first DCHB was brought out in 1971 Census – that being the first Census organised and conducted in Goa on the All India pattern after its liberation from the erstwhile Portuguese rule. Considering the small size of the districts of Goa, Daman & Diu in the erstwhile Union Territory of Goa, Daman & Diu, a combined volume for all the three districts was brought out both in 1971 and 1981 Censuses. Consequent to the formation of the new State of Goa and the districts of North Goa and South Goa in 1987, separate DCHBs have been brought out for the district of North Goa and South Goa in the 1991 Census. Thus this volume of 2011 is the third in the series for the North Goa District.

This volume contains the salient results based on the data collected at the Census of India, 2011 and in addition contains other non-census information in respect of villages and towns of the district. It is a grass root level statistical data on demographic characteristics and other amenities in the villages and towns, which is an essential aid for district level planning and administration. Among the series of Census publications, District Census Handbook is the only source, which provides these basic data for each village and ward within a town. And as such, it has come to be recognized as the most demanded and widely used publication.

In this publication, C.D. Block is the main unit of presentation for Village Directory rather than the traditional taluka. However, since in North Goa District, the C.D. Block and taluka boundaries are co-terminus excluding statutory towns, there is no major difference in their presentation. The DCHB of 2011 Census, alike, 2001 Census, has two parts A and B. While Part A contains the Village and Town Directory, Part B confines itself to the Primary Census Abstract. As in the earlier Censuses, both Part A and B are combined in this volume since, the data presented therein are closely inter-related.

Since, the district of North Goa and South Goa formed in August, 1987, district level data in respect of some sector were not available. Further, Goa being a small and compact State, bifurcated into two districts for administrative purpose, the write up/analysis for certain items like history, physical feature has been generally confined to the State level with an emphasis to the district wherever possible.

The relevant non-census data for the Village and Town Directory was primarily collected through the Mamlatdars/Municipalities and Panchayats. Much of the data so supplied have been cross checked with the data obtained from Department of Education, Health, Land Survey, Electricity, Planning Statistics & Evaluation, Post and Telegraph etc. I take this opportunity to offer

my grateful thanks to all these departments and the concerned officials for all their cooperation in furnishing the data.

This Handbook is the result of the hard work and labour of several persons in my office. In particular, I wish to place my grateful appreciation of the contribution of Shri Mallikarjuna, Joint Director and Shri. R N Naik Assistant Director of Census Operations, Goa. I wish to place on record the services rendered by Shri. P R Gaonker, Assistant Director (T) in preparing the Analytical Note and Analysis of Data in respect of Village/Town Directory and the Primary Census Abstract. The collection, compilation and scrutiny of data and preparation of related statements and tables have been undertaken by Smt. Jyoti A Mahatme, Statistical Investigator Grade I. The maps presented in the volume are prepared by Shri Victor S Pereira, Senior Draughtsman. The computer typing of the manuscript and the tables have been done by Smt. Renu Arora, Senior Consultant and Miss Deval Naik, Junior Consultant (Ministerial). I express my deep sense of gratitude to all of them. The officers/officials who have contributed in bringing out this volume are acknowledged separately.

I would like to place on record my sincere gratitude to Dr. C Chandramouli, IAS, Registrar General & Census Commissioner, India for the benefit I have derived by way of guidance and advice. Shri R. C. Shetty, Dy. Additional Registrar General and Dr. Pratibha Kumari, Assistant Registrar General (Social Studies) and Dr. A. P. Singh, Dy. Registrar General (Map) provided the technical guidance in this work which is gratefully acknowledged.

## **HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK**

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity'

manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

---

## Brief History of The District

The name of the territory "Goa" seems to have been derived from Gomanta which is referred to in the Bhishmaparva of the great epic Mahabharata and also the Harivamsa and Skandapurana. It is referred to in old inscription variously as Gomanchala, Gomanta, Gopakpura and Gove. The Madras glossary connects it with the Sanskrit "go" (Cow) in the sense of "Cowherds" country.

According to Pauranic tradition, Parashurama, the sixth incarnation of god Vishnu, is said to have reclaimed the land of Gomanta from the sea and the Aryans and Brahmins of different stocks were settled by him on the banks of the rivers Gomati and Aghanasim, which are now popularly known as Mandovi and Zuari respectively.

Before the advent of the Portuguese early in the 16<sup>th</sup> Century, the State covered very extensive areas which included towards the north, part of the Sindhudurg District of Maharashtra then known as Kudal and

Rajapur Mahals up to the river Karepatan. The Southern limits extended towards Ankola and comprised the ancient Mahals of Supa, Halyal and Karwar now forming part of the Uttar Kannada district of Karnataka. Towards the east it covered a large portion of Belgaum district of Karnataka.

The earliest known historical record of Goa belongs to the 4<sup>th</sup> Century A.D. the Bhojas from Aparant

or Konkan referred to in the rock cut edicts of the Emperor Ashoka (3<sup>rd</sup> Century B.C.) seems to have held their sway over Goa before Christian era. Later on it was under the rule of Satavahanas of Kolhapur in the first century of the Christian era. The Bhojas continued to rule over Goa from their capital at Chandrapur modern Chandor upto the 7<sup>th</sup> Century A. D. The Konkan Mauryan followed the Bhojas. The king Anirjitavaram belonging to the konkan Mauryan Dynasty ruled over the North part of Goa from Kumaradvipa (present Cumbarjua in Tiswadi taluka) during the 6<sup>th</sup> Century. It formed part of the empire of Chalukyas of Badani from 580 to 750 A.D.

The next important dynasty which dominated affairs in Goa for over two and a half Centuries was the family of the South Konkan Silaharas who hailed from Goa itself. The North Konkan Silaharas who was ruling from Sthanaka (Thana) routed them. They occupied Gopakapattana for some time till the Goa Kadambas who had established themselves at Chandrapur ousted them. The Kadambas ruled from about 980 A.D. to about 1355 A.D.

In the beginning of the 11<sup>th</sup> Century the Kadambas of Goa extended their authority over the whole of Goa vanquishing the Silaharas. In the 13<sup>th</sup> Century the territory passed under the rule of the Yadavas of Devagiri and the Kadambas ruled as their feudatories. The Kadambas at Goa seems to have become independent by the early part of the 14<sup>th</sup> Century A. D. When Yadavas were defeated at the hands of the Delhi Sultans. Goa became a part

of the Vijaynagar Kingdom by the 14<sup>th</sup> Century. In 1469 Goa passed under the Bahamani's Sultan of Gulbarga when Mahmud Gwan, a general of Muhammed III (1463-1482) conquered the Konkan area. With the breakup of the Bahamani dynasty, it became a part of the kingdom of the Adil-Shahas of Bijapur in 1488, from whom the Island of Goa was taken by the Portuguese in 1510.

Afonso de Albuquerque, a Portuguese General, is known as the founder of the Portuguese rule of Goa in India. He first captured Goa on 17<sup>th</sup> February 1510. Yusuf Adil Shah, the Sultan of Bijapur retook it on 23 May 1510. Albuquerque conquered the important port of Goa so as to maintain Portuguese Supremacy over the seas and the neighboring kingdoms. By and by he annexed new enclaves on the coast and made all possible efforts to consolidate them under one rule. The 'Concelhos' (talukas) of Bardez and Salcete were conquered in 1543. By the middle of the 16<sup>th</sup> Century, the Portuguese were successful in establishing their rule in four Concelhos (talukas) which are known as "Velhas Conquistas" (old conquistas) which comprised the island of Goa, (Tiswadi) and the talukas of Salcete (inclusive Mormugao) and Bardez.

The Marathas under Shivaji built up a strong fleet and harassed the Portuguese on the seas during the 17<sup>th</sup> Century. While his army overran Bardez, Sambhaji, his son threatened at the very gates of the city of Old Goa but had to give up the siege to meet the Mughals. After the decline of Maratha power, by the end of the 18<sup>th</sup> Century the talukas of Pernem, Bicholim and Satari situated to the

North, which were ruled by the Marathas, vassals of the Sawantwadi were occupied by the Portuguese in 1788. Similarly talukas of Ponda, Sanguem, Canacona and Quepem forming part of the territory of Maratha vassals Chief of Sounda were occupied by the Portuguese by the end of the 18<sup>th</sup> Century. These annexations were called "Novas Conquistas" (New Conquests).

The 19<sup>th</sup> Century was noted for bloodshed and political uprising in Goa. The liberation of Dadra & Nagar Haveli in 1954 gave a further fill up to Goan freedom movement. The Government of India tried again and again to persuade the Portuguese Government to withdraw peacefully, but the latter did not respond favorably. This adamant attitude of the Portuguese ultimately, forced the Government of India to send an army to liberate Goa. This historic event which marked the end of about 450 years of Portuguese rule took place on December, 19, 1961 and Goa became free and a part and parcel of India on that day. Goa was a district of the then Union Territory of Goa, Daman and Diu until May, 30, 1987 when Goa attained Statehood. For detailed history of Goa, the Gazetteer of the Union Territory of Goa, Daman & Diu District Gazetteer Part 1-Goa, Gazetteer Department, Government of Goa, 1979 may be referred to.

Consequent upon the formation of new State of Goa, it was divided into two districts viz. North Goa and South Goa under Government Notification No. 16/15/87-RD dated August, 1987 with their headquarter as Panaji and Margao respectively. The Southern part of Goa has been named as South Goa District. South

Goa District comprising five talukas under three sub -divisions as under:-

Name of Sub-divisions	Name of talukas included
Margao	Salcete
Mormugao	Mormugao
Quepem	Quepem
	Sanguem
	Canacona

The Northern part of Goa has been named as North Goa District which comprises the remaining six talukas of Goa State.

## **ADMINISTRATIVE SET UP**

The South Goa District as the very name suggest covers the entire Southern part of the State of Goa. The Collector heads the district administration with the headquarters at Margao. An Additional Collector and Deputy Collectors assist him. The district is divided into three sub-divisions viz. (i) Margao consisting of Salcete taluka, (ii) Mormugao consisting of Mormugao Taluka, (iii) Quepem covering the Talukas of Quepem, Sanguem and Canacona . There are in all five talukas namely Mormugao, Salcete, Quepem, Sanguem and Canacona. For the purpose of revenue administration each taluka is in charge of a Mamlatdar. Further, for developmental activities, each taluka constitutes a separate C.D. Block under a Block Development Officer. Thus, in South Goa District there are three Sub-divisions, five Talukas and five Community Development Blocks. The Taluka and C.D. Block boundaries are coterminous excluding the Statutory Towns in South Goa.

There are 132 inhabited villages and 16 towns in South Goa as per the 2011 Census. There are seven uninhabited villages five are in Sanguem Taluka, one each in Mormugao and Canacona Talukas and one village in Sanguem Talukas is submerged due to the construction of Salaulim dam. Among the 16 towns, seven are Municipal Towns two each in Salcete and Quepem and one each in three talukas and remaining nine are Census Towns with civic status of a Village Panchayat. At District level there is one Zilla Panchayat and 69 Village Panchayats in South Goa, a Panchayat comprising of one village or a group of villages.

## **DISTRICT HIGHLIGHTS-2011 CENSUS**

- South Goa is the 1<sup>st</sup> small district in terms of size and 2<sup>nd</sup> larger in population of the State.
- South Goa is the most urbanized district in the State having about 64.59 per cent of its population in urban areas whereas about 62.17 per cent of State's population lives in urban area.
- In terms of population per sq. km. South Goa is the 2<sup>nd</sup> densely populated district in the State.
- South Goa has 1<sup>st</sup> rank in terms of sex ratio in the State.
- There are only 7 uninhabited villages in the district.
- Poinguinim (Canacona Taluka) is the most populated village (6,625) and Moissal (Sanguem Taluka) is the least populated village (8) in the district.
- Sanguem Taluka is having the highest number of villages (51) in the district and Canacona Taluka is having the lowest number of villages (8) in the district.
- Cotigao village (Canacona Taluka) has the largest area (11,171 hectares) and Sao Jacinto Island village (Mormugao Taluka) has the smallest area (15 hectares) among the villages in the district.
- South Goa has attained fame of historical temples, churches, forts and world famous beaches.

## **Section - I**

# **Primary Census Abstract (PCA)**

## Brief Note on Primary Census Abstract

### Introduction:

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

### 2. Population Enumeration - Census 2011:

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28th February, 2011 alongwith a revisional round from 1st March, 2011 to 5th March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand states that remain snowbound in February. In these locations the population enumeration was done from 11th September, 2010 to 30th September, 2010 along with a revisional round from 1st October, 2010 to 5th October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing & Housing Census, the enumeration of the Houseless population was carried out on the night of 28th February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing & Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

### **3. Quality Assurance:**

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their States/UTs. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in

place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

#### **4. Primary Census Abstract:**

The Primary Census Abstract which is an important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

#### **5. Level of Presentation of PCA data in District Census Handbooks:**

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract - District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes - District/C.D. Block/Town.
4. Village Primary Census Abstract - C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

## **6. Area Figures:**

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.
